

Wiring for a DELL 30 inch HDTV/LCD monitor in the master bedroom. A 50ft SVGA cable will connect the monitor to a SVGA amplified multiplexer attached to a computer located in the basement office. Homeowners will be able to work on the computer as well as browse the web using a wireless keyboard and mouse. The same configuration is installed in the kitchen. A 23-inch DELL HDTV/LCD monitor will be installed in the granite countertop there.

Home is wired for HDTV, Digital Cable, Satellite TV, High-Speed Internet throughout, 11-zone audio/video distribution, Video Cameras, IR distribution, 4 incoming phone/fax lines, whole house paging, keypad control for entertainment, and 802.11 A, B, G wireless networking.
